**Rules for Public Hearing – 9/21/2021**

This Public Hearing provides an opportunity for local public input related to the request for rezoning and a special exception to allow a rock quarry. There are many people that have already contacted us about this issue and we expect to hear from quite a few at the Public Hearing. We do not want to limit anyone's freedom of speech but we also want to be efficient with everyone's time. In order to allow everyone a reasonable opportunity to express their views and ask questions, we are going to start the Hearing with no more than 10 minutes from the requestor to summarize and explain the project request. Then people choosing to speak will be allowed 4 minutes each. If people want to just express their support or opposition and recognize that their reasons and/or questions have already been listed, that could help streamline the process. Following the comments from the public, we will allow up to 15 minutes for the requestor to address questions that arose.

Other rules related to all public hearings and public comment sessions still apply. Speakers will not demean others. The public hearing is not a forum to disparage individuals or companies but an opportunity to express ideas about the requested rezoning. Speakers will do that in a respectful, courteous, and professional manner or forfeit the remainder of their time. We also ask that the crowd remain respectful and courteous. Do not interrupt the speaker, wait to be recognized and you will be heard. If you need to have a conversation with someone else during the public hearing, please step out of the room so that you do not prevent others in the crowd from hearing the speaker.
